Dear Sirs and Madams,

In order to be able to ensure our production and delivery capability for you in the course of the Covid-19-(Corona)-virus spread, we have formed separate groups of employees in all departments (production, shipping, warehouse logistics, internal departments) and processes which prevent that employees from different groups meet and thus spread possible infections among themselves.

Our customer service team and warehouse logistics is still available for you during office hours.

Of course, all employees will regularly be updated through recurring information events on this topic in terms of hygiene and cleaning measures as well as general and personal handling of the current situation.

Also we regularly ensure that equally effective measures at our external partner companies (suppliers, logisticians, IT system support) make the greatest possible effort to maintain delivery, production and shipping routes.

In case of delivery delays or product bottlenecks despite all the measures taken, we will of course inform our business partners immediately.

Stay healthy!

Sincerely,

Oliver Petzoldt
-CEO & Managing Partner-
